DETAILED ACTION

1. The amendment filed January 4, 2011, is acknowledged and has been entered. Claims 29 and 30 have been amended.
2. Claims 29-34 are pending in the application. Claims 31-34 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on April 14, 2009.
3. Claims 29 and 30 have been examined.

Priority

4. Applicant's claim under 35 U.S.C. §§ 119(e) and/or 120, 121, or 365(c) for benefit of the earlier filing date of Application No. 09/804,690, filed March 12, 2001, which claims benefit of Application No. 09/146,187, filed September 1, 1998, which claims benefit of Application No. 08/977,818, filed November 25, 1997, which claims benefit of Application No. 08/670,274, filed June 13, 1996, which claims benefit of Application No. 08/585,758, filed January 16, 1996, which claims benefit of Provisional Application No. 60/006,856, filed November 16, 1995, is acknowledged.

Double Patenting

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140

Art Unit: 1643

F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 29 and 30 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-3 of U.S. Patent No. 5,807,995-A. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1-3 of the patent are drawn to a purified polypeptide composition comprising at least 50 weight % of the protein present as a TSG101 protein or a fragment thereof, wherein said polypeptide is a human protein and claims 29-30 are drawn to an isolated human TSG101 polypeptide comprising the amino acid sequence of SEQ ID NO: 21.

Conclusion
